

ACT Engineering – About Us

We are one, great interdisciplinary team with 6 strong areas of expertise. Our business is one of balance and interconnectedness within ourselves and for our clients. We think of our clients as partners. We always include their best interests in the over-arching objectives and elements of a project. We are equally successful in private and public sector works and are honored to be awarded federal works projects.

We've consistently grown organically for 25 years. We are a compact organization and define ourselves as a large partnership – between our internal team members, our clients and any stakeholder. Our achievements are a result of our devotion to our clients and our client's devotion to ACT Engineering – a great deal of ACT's work is for repeat clientele. We've grown at a pace that aligns with our successful projects and client-base. Our accomplishments and continued growth are intrinsically linked to the accomplishments and growth of our clients.

Those projects are our milestones and our history – those achievements tell the story of ACT.

CORE VALUES:

INTEGRITY & EXCELLENCE

We do the right thing, at the right time, for the right reasons. We meet and exceed industry and quality-assurance standards, always.

CREATIVITY

We apply solutions, across the board, by not limiting ourselves by the “given” parameters. We ask “Why”. We explore, or create, every possible solution. We seek and find ways to address any and every challenge.

TECHNOLOGY & INNOVATION

While not a research and development company, we are always implementing the leading hardware and software in our industry. We are proud of our innovative use of available technology and practices.

EXPERIENCE

Our company represents 20+ years of experience in every area of expertise. We've seen a lot and we've done a lot. We are proud of our junior-level associates here, bringing great energy to our projects. We believe in mentoring and supporting our area Vo-Tech schools and colleges.

TEAMWORK

We make our partnerships of our projects. We connect and support every link of the chain, internally and externally. Always collaborative and always communicative, we're always working together towards the common goals.

VALUE & OUTCOMES

From day-one, we are supporting the client's goal setting. We are always aware of what can and should be done with the available resources. We ensure that our client's investment is money well spent. We keep the end-goal at the forefront at every point. We go out of our way to chart a well-defined path and ensure that the path to get there is clear.
